

Securing the Connected Factory in an Era of Converged IT/OT Threats

AI-Powered OT Security Operations Center for Manufacturing

Manufacturing environments are becoming increasingly connected but every connection introduces potential cyber risk.

The Connected Factory

Managed OT Security & Continuous Manufacturing Resilience

Primary Engagement

SOC-AS-A-SERVICE

Extend your security operations without building
a specialized OT SOC from scratch.

Core Capabilities

- 24/7 OT Security Monitoring**
Continuous monitoring across manufacturing environments.
- OT MDR / MSS**
Managed detection and response tailored to OT.
- Protocol-Aware Threat Hunting**
Identify suspicious behaviors across industrial communications.
- Passive OT Monitoring**
Gain visibility while minimizing impact on production.
- IT/OT SOC Integration**
Correlate OT and enterprise security events.
- OT Security Consulting**
Assessments, architecture, segmentation and transformation.
- Compliance & Governance**
Support security governance and continuous evidence generation.

AI Expansion

From OT Security to Enterprise AI

BUILD INTELLIGENT OPERATIONS TODAY.

Prudent Technologies & Consulting

Digital Transformation • Data & AI • Cybersecurity • Enterprise Applications
